

## Products

The **functional matrix** shows a comparison of the functions available in the different versions of GUM Workbench.

- **GUM Workbench Standard Version 1.3**

GUM Workbench Standard Version 1.3 is the basic tool for the evaluation of uncertainty in measurement with one result quantity and one budget table.

- **GUM Workbench Professional Version 2.3**

GUM Workbench Professional Version 2.3 is the professional tool for the evaluation of uncertainty in measurement with multiple result quantity and multiple budget tables.

- **GUM Workbench Professional Version 2.4**

GUM Workbench Professional Version 2.4 is the professional tool for the evaluation of uncertainty in measurement with multiple result quantity and multiple budget tables. In Addition to Version 2.3, pictures, graphics and plots are supported and a Monte Carlo simulation of the model is possible.

- **GUM Workbench Educational Version**

GUM Workbench Educational Version is a functional limited version which can be freely copied and used for educational purposes.

- **Network licenses**

All versions of GUM Workbench are available as network licenses which are installed on a central file server to be used by multiple users.

- **GUMCAD Version 1.2**

GUMCAD Version 1.2 is a compact graphical editor for the construction of graphical measurement process diagrams and cause-and-effect chain diagrams. An integrated analysis tool can automatically generate the model equation (measurement function) from the graphical diagram.
